Work Authorization: U.S. Citizen

Education: University of California, Berkeley – B.S. Mathematics & Statistics, 2010

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years of experience building scalable, end-to-end systems across enterprise and high-growth startup environments. Strong expertise in backend architecture, distributed systems, and modern frontend application design, with a focus on performance, reliability, and user experience. Proven track record of leading technical initiatives and delivering production-grade solutions from concept to deployment.

A collaborative team player who thrives on sharing knowledge, supporting team growth, and fostering a positive work environment. Humble and driven, with a strong desire to learn, improve, and contribute to impactful solutions.

SKILLS

Frontend: React, Next.js, Angular, Tailwind CSS, Bootstrap, Redux, React Query, Context API, NGXS

Backend: Node.js, Nest.js, Express.js, Spring Boot, Django

Database: PostgreSQL, MySQL, DynamoDB, MongoDB

Cloud & DevOps: AWS, Docker, CI/CD

Messaging & Caching: RabbitMQ, AWS SQS, AWS SNS, Redis

APIs & ORM: GraphQL, Prisma, TypeORM, Sequelize

Languages: JavaScript, TypeScript, Java, Python

EXPERIENCE

Yahoo: Web Services Company

Senior Software Engineer

June 2025 – Present / Remote, USA

- Contribute to the modernization and migration of legacy systems to a modern architecture using **Node.js**, **TypeScript**, and **React**, improving system scalability, maintainability, and long-term engineering velocity.
- Designed and developed backend services in **Java** to integrate with multiple internal systems, supporting large-scale data ingestion, transformation, and processing pipelines for critical business workflows.
- Architected and implemented event-driven systems using **AWS SQS** and **AWS SNS** to enable reliable, asynchronous distribution of news data across downstream services and platforms.
- Authored and maintained comprehensive technical documentation covering system architecture, data pipelines, and integration patterns, improving cross-team alignment, onboarding efficiency, and long-term maintainability.

[Heyo:](#) *Design & Development Agency*

Senior Software Engineer

July 2024 – June 2025 / Remote, USA

- Served as a key engineer on a large enterprise project, designing and building scalable backend services with **Node.js**, including robust **RESTful APIs** and system endpoints to support complex business workflows and system integrations.
- Developed high-performance frontend applications using **React/Next.js**, building advanced UI components and implementing **state management** and data synchronization with **React Query** to ensure efficient data flow and optimal user experience.
- Developed and maintained backend services using **Python** and **Django**, implementing business logic, integrating with internal and third-party systems, and contributing to the delivery of reliable, production-grade features.
- Collaborated closely with product managers and design teams to translate evolving business requirements into scalable, production-ready technical solutions.

[Fisker:](#) *A US Listed EV company*

Senior Software Engineer

Feb 2022 – May 2024 / Remote, USA

- Served as a core full-stack engineer supporting multiple teams and driving cross-functional feature delivery across critical business systems.
- Architected and led the development of an internal API Gateway and a Pre-Order service using **Node.js (Nest.js)**, **Redis** caching and **GraphQL**, improving system performance.
- Built reusable, high-performance frontend components with **React/Next.js** to deliver high quality user-facing products.

[CoreLogic:](#) *Fintech company serving data to real estate*

Senior Software Engineer

Nov 2021 – Feb 2022 / Irvine, CA

- Built and maintained scalable enterprise applications using **Java Spring Boot**, and **Angular**, optimizing performance and improving user experience.

[SourceStrike:](#) *Software engineering consulting firm*

Software Engineer

Mar 2019 – Nov 2021 / Irvine, CA

- Played a key engineering role in a two-year enterprise project using **Angular** with **NGXS**, delivering complex features under tight deadlines.
- Developed full-stack solutions for a startup client using **Next.js** and **Node.js**, building scalable microservices and responsive user interfaces.

[Taylor Digital:](#) *Digital marketing firm*

Software Developer

Nov 2017 – Mar 2019 / San Clemente, CA

- Developed various applications using **Angular**, **Sails.js**, **Laravel**, and **Ionic** across diverse technology stacks.
